solutions for everyday protection

# Hygiene solutions for all workplaces and public facilities

Transparent communication and compliance with hygiene measures are among the most important steps in maintaining hygiene standards and preventing infection. In large companies, retail and healthcare facilities with many employees and visitors, employers can contribute to the safety of employees as well as their customers and patients with the appropriate tools and education.

In addition to providing information, employers are obliged to ensure that the safety and hygiene measures used throughout their facilities are appropriate. The efficient products and well thought-out solutions from DURABLE help to fulfil these requirements.

DURABLE has 100 years of expertise in professional presentation and organisational concepts that are used in a wide range of professional fields worldwide. The future-oriented company recognises work trends and develops innovative concepts for the needs of the changing world of work. During manufacturing, the family-run medium-sized company gives priority to regional suppliers and partners and to the use of recyclable materials.
